

## Training Session Presentation:

The training session goals are to:

- Explore the need for financial education
- Discover how **Biz Kid\$** teaches kids about managing money and business
- Identify **Biz Kid\$** classroom resources
- Learn how to involve community partners in the classroom through **Biz Kid\$**

The pages contain a scripted presentation for the training. Each page pictures a presentation slide with a suggested script and related handouts to use when training teachers and other educators. The handouts are available for download as part of this kit. The original Microsoft PowerPoint file is available for download as part of this kit. Each workshop audience is individual in their needs, so the PowerPoint can be customized. The scripted version of the PowerPoint can be edited in the Notes View of the PowerPoint. The presentation can be shortened to accommodate a shorter workshop time frame. So add and delete slides as best suits the audience needs and your time parameters.
